

Risk Committee Effectiveness Survey

"Many boards rely heavily on a board and/or one or more management risk committees to assist them with their oversight obligations in relation to risk."

Why conduct a Risk Committee Effectiveness Survey?

With the Global Financial Crisis and the increasing call for improved corporate governance and board accountability, right now is one of the most important times to carry out a world class Risk Committee Effectiveness Survey.

Risk committees can demonstrate their leadership, their commitment to good corporate governance and accountability to stakeholders by conducting an independent review of their effectiveness in relation to their oversight of risk.

The ultimate responsibility for an organisation's risks rest fairly and squarely on the board or governing body of an organisation. Many boards rely heavily on a board and/or one or more management risk committees to assist them with their oversight obligations in relation to risk.

Despite the many millions of dollars that have been invested in risk management systems and resources, risk systems continue to fail around the world, with disastrous consequences.

Most people understand the importance and benefits of a regular medical check up to identify any risks to their health and to determine whether their bodies are functioning to their optimal capacity.

In a similar way, Boards Insync recommends the regular use of its Risk Committee Effectiveness Surveys to determine any risks to the "health" of a risk committee and the extent to which it is functioning to its optimal capacity in relation to its oversight of risk.

“ ... it can be an important part of a risk assessment process that identifies weaknesses and areas for improvement in an organisation’s risk management framework, culture, systems and practices. ”

Whilst a Risk Committee Effectiveness Survey is unlikely to prevent the failure of an organisation’s risk systems, it can be an important part of a risk assessment process that identifies weaknesses and areas for improvement in an organisation’s risk management framework, culture, systems and practices.

The Risk Committee Effectiveness Survey was initially designed for board and management risk committees of large banks, finance and insurance organisations. It has also been tailored for boards and management risk committees of public and private companies, government and not-for-profit entities.

A risk committee review can be done by using a Risk Committee Effectiveness Survey either separately or in conjunction with member and management interviews, reviews of the charters, agendas, committee papers, minutes and the like by experienced board and risk specialists.

The comprehensive report that is prepared following the completion of the survey is designed to measure the current extent of effectiveness and to highlight improvement initiatives.

A sample report is included on our website.

Main benefits of our Risk Committee Effectiveness Survey

The purpose of the Risk Committee Effectiveness Survey is to identify actions that can be taken to improve the effectiveness of a board or management committee’s oversight of an organisation in relation to its risk management framework, culture, systems and practices.

Issues of the committee’s structure, composition, meetings and reporting in relation to risk are also addressed. Committee members are taken through a comprehensive range of issues relevant to their oversight of risk in a structured way.

The benefits of using the online Risk Committee Effectiveness Survey include:

- many issues that may not otherwise be included as part of a risk committee review are considered
- committee members consider a comprehensive range of issues in a consistent way by responding to the same survey statements in the same order and using the same response scale
- committee member views are equally weighted and such views are not biased or impacted by the view or emotions of other members or consultants
- committee members are able to balance their consideration of each issue against the other issues in a well designed survey that takes less than 30 minutes
- an “importance” and “performance” response rating system and a corresponding “gap” analysis enables the prioritisation of issues
- the survey is independently carried out by Boards Insync, which offers anonymity to respondents and encourages candid responses.

This survey is a very useful, cost effective and unobtrusive way to quickly highlight possible issues of concern and issues that may need further attention. The survey does not replace the need to take appropriate action in relation to issues highlighted, nor does it override the need to take other steps to review and improve risk management and oversight.

Comprehensive survey framework

The Risk Committee Effectiveness Survey is based on a comprehensive survey framework of 10 areas that impact the effectiveness of a committee’s oversight and management of risk.

The survey statements included in the Risk Committee Effectiveness Survey cover 98 distinct matters. The survey statements are designed to be penetrating and to encompass good risk management and/or good committee practice in relation to risk. Committee member written responses to four questions add context and improve the usability of the report.

The survey statements have also been designed to integrate with Boards Insync’s separate Board Risk Survey and Employee Risk Culture Survey. Significant extra insights are gained by organisations that carry out more than one of Boards Insync’s integrated risk surveys and one or more of its other board surveys.

The survey framework and the relevant survey statements can be tailored to meet the requirements and specific circumstances of each client.

The ten survey framework areas and the main matters addressed in each framework area are shown below.

1. Committee structure and purpose

*Committee structure
Member impartiality
Committee charter
Senior management clarity
Delegations clear
Other support*

2. Committee composition and resourcing

*Member expertise
Member contributions
Induction
Education and training
Succession planning
Additional resources*

3. Committee leadership, teamwork and dynamics

*Chair leadership
Robust discussions
Committee teamwork
Main concerns addressed
Nothing off limits
Candid responses*

4. Committee agenda, meetings and minutes

*Comprehensive schedule
Agenda input
Unambiguous decisions
Executive sessions
Minutes of meetings
Follow-up processes*

5. Reports to and from our committee

*Timely reports
Substantive risks
Non-compliance
Emerging risks
Independent risk reviews
Other committees/board*

6. Risk culture

*Tone from the top
Values and behaviours
Employee incentives
Upward information flow
Risk embedded
Proactive and decisive*

7. Risk appetite, strategy and framework

*Risk appetite
Risk strategy
Organisation structure
Risk management framework
Risk policies
Common terminology*

8. Risk identification and assessment

*Compliance obligations
Understand business
Identification of risks
New business risks
Reviews refreshed
Flow-on effect of risks*

9. Controls

*People resources
System resources
Education and awareness
Risk controls
Exposure and authority limits
Risk mitigation*

10. Monitor and review

*Stakeholder concerns
Risk register
Follow-up processes
Consequence management
Continual improvement
Regulator interactions*

“*The survey framework and the relevant survey statements can be tailored to meet the requirements and specific circumstances of each client.*”

About Boards Insync

Boards Insync is the specialist board survey division of Insync Surveys. It has one of the largest suites of integrated board surveys in the world, including Board Effectiveness Surveys, Board Risk Surveys, Audit Committee and Risk Committee Surveys and Director 360 Surveys.

Its world class board surveys are available globally and have been carried out for numerous large public, private, government and not-for-profit organisations.
